

# Compact Card Layout Fix

---

## Issues Fixed

### 1. Cards Too Large

- **Problem:** Cards were using `aspect-square` which made them gigantic on the screen
- **Solution:** Changed to fixed heights:
  - Manual transaction cards: **240px** height
  - Saved statement cards: **200px** height

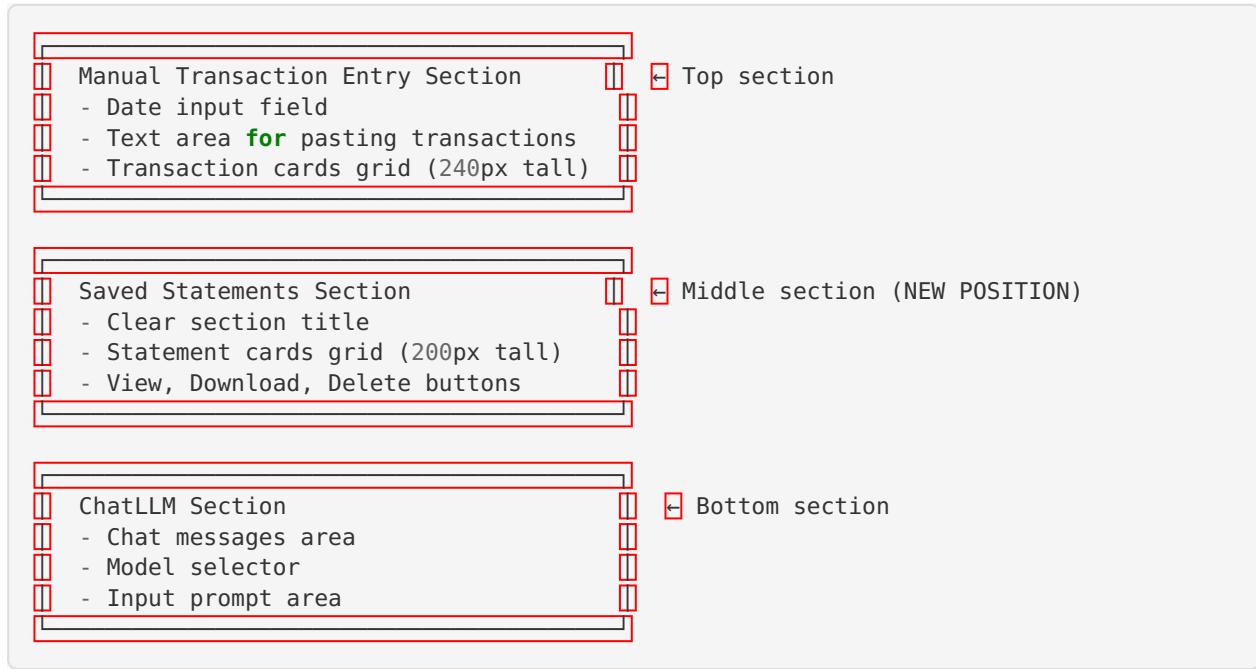

### 2. Saved Statements Section Hidden

- **Problem:** The “Saved Statements” section was at the bottom of the page, covered by the ChatLLM prompt area
- **Solution:**
  - Moved “Saved Statements” section to be its **own separate section**
  - Positioned **BEFORE** the ChatLLM section for better visibility
  - Section title is now clearly visible and not covered by any prompt

### 3. Layout Improvements

- **Responsive Grid System:**
  - 1 column on mobile
  - 2 columns on small tablets (sm)
  - 3 columns on large screens (lg)
  - 4 columns on extra-large screens (xl)
- **Compact Design:**
  - Reduced padding and spacing
  - Smaller font sizes (11px, 10px for metadata)
  - Condensed button text: “Load (118)” instead of “Load to Database (118 transactions)”
  - Transaction previews limited to 4 items instead of 5

## Layout Structure (New)

## Files Modified

### /app/components/bank-statements/bank-statements-client.tsx

- Changed container width from `max-w-5xl` to `max-w-6xl` for better card distribution
- Updated manual transaction cards:
  - Removed `aspect-square`, added `h-[240px]`
  - Added responsive grid: `grid-cols-1 sm:grid-cols-2 lg:grid-cols-3 xl:grid-cols-4`
  - Reduced transaction preview from 5 to 4 items
  - Smaller buttons and text
- Moved saved statements section before ChatLLM section
- Updated saved statement cards:
  - Changed from `aspect-square` to `h-[200px]`
  - Added responsive grid: `grid-cols-1 sm:grid-cols-2 lg:grid-cols-3 xl:grid-cols-4`
  - Reduced font sizes for better compactness
  - Shorter button labels ("CSV" instead of "Download")

## Card Sizing Summary

Card Type	Old Size	New Size	Grid Columns
Manual Transaction Cards	<code>aspect-square (~300-400px)</code>	240px fixed	1-4 columns
Saved Statement Cards	<code>aspect-square (~300-400px)</code>	200px fixed	1-4 columns

## Testing

---

1. **Login** to the app: `khouston@thebasketballfactorynj.com` / `hunterrr777`

2. **Navigate** to Bank Statements page

3. **Verify:**

- Manual transaction cards are small and compact (240px height)
- “Saved Statements” section title is visible (not covered)
- Saved statement cards are small and compact (200px height)
- Cards display in responsive grid (1-4 columns)
- ChatLLM section is below and doesn’t cover other sections
- All buttons and interactions work properly

## Status

---

**READY FOR USE** - Build successful, compact layout implemented
